

The Texas A&M University System is replacing various legacy mainframe payroll and human resource systems with one unified system called **Workday**.

The A&M System will benefit from *Workday's* intuitive, web-based applications with self-service and mobile capabilities. *Workday* is designed to work the way we work today and will help create a more nimble, process and data driven organization.

*Workday* will replace many of the current Single Sign-On applications. It will launch on December 17, 2017 with the following modules: HCM (Core HR), Compensation, Benefits, Payroll, Recruiting, Absence, Time Tracking, Reporting, Talent Management, and Performance Management.

Additional information, including many useful resources and tools, is available at:
