**Katie Kueck MARS '96**

**Integrated Management Systems  
Coordinator, Mitsubishi Chemical**

**SAT, OCT 19TH 1230-1400  
MAIN 114**

Katie graduated with a BS in Marine Sciences from Texas A&M University at Galveston in May 1996, focusing on chemistry.

Katie is the Integrated Management Systems Coordinator with Mitsubishi Chemical LaPorte. A diverse background of positions prepared her for this role, including Quality Representative, Sales Representative, Lab Manager, Chemist, and Research Assistant in a wide range of sectors, including manufacturing, environmental, and medical. Drawn to the laboratory, Katie began her career in an environmental laboratory, testing for metals in Water and Soil samples. She then moved on to the manufacturing sector, performing QA/QC testing on production samples and producing calibration standards.

Always passionate about quality management, Katie then began a migration toward a position where she could utilize her extensive laboratory background to troubleshoot and improve operations.

Within her current role, Katie ensures her facility maintains its compliance with the ISO 9001 Quality Management Standard, the ISO 17025 Standard for Testing and Calibration Laboratories, and the Responsible Care 14001 Standard for Health, Safety, Security, and Environmental Performance. As a Certified Lead Auditor, she directs the internal audit program, while also utilizing her diverse expertise to lead Mitsubishi Chemical toward minimizing risk and driving continuous improvement for customers, people, and the environment.
