Digital Openness Global Business
Development Manager at SLB D&I

With a foundation in Oceanography and a focus on Geology, Kendall Thomas graduated with a BS in Marine Science from TAMUG in December 1996.

Kendall is the Digital Openness Global Business Development Manager at SLB D&I, where she has built a distinguished career spanning nearly 28 years with Schlumberger (SLB). Her journey began as a Geophysicist, delving into the complexities of subsurface geology and seismic data interpretation. Over the years, Kendall has held various pivotal roles, including Training Center Manager, Account Manager with WesternGeco (Seismic), and Geological Modeling Expert with Water Services, where she applied oilfield technologies to the mining industry.

In her current role within the Digital & Integration division, Kendall bridges technology and business, delivering integrated digital solutions to resolve customer challenges. As the Digital Openness Business Development Manager, Kendall is at the forefront of guiding technology strategies and driving business expansion. She focuses on merging SLB, partner, and customer digital applications to offer a comprehensive and seamless end-user experience.
